INMORE

OEM COMPONENTS

FROM DRAWINGS TO FINISHED PARTS

HEBEI INMORE METAL PRODUCTS CO., LTD.

Your reliable OEM manufacturing partner in China.

METAL EXPERTISE. GLOBAL OUTLOOK.

China-based manufacturing and export expertise for custom metal castings, CNC machined components and OEM metal parts.

22

YEARS OF FOUNDER INDUSTRY EXPERTISE

2007

Integrated casting & machining factory established

Our founder holds an ownership stake in this factory. A network of long-term manufacturing partners extends our production resources.

Technical knowledge. International experience.

YOUR COMPONENT. OUR FOCUS.

CAST.
MACHINE.
DELIVER.

01 MATERIALS

Gray iron / Ductile iron / Cast steel

02 CASTING

Resin sand / Shell molding / Investment casting

03 MACHINING

Turning / Milling / Drilling / Tapping / Grinding

04 FINISHING & INSPECTION

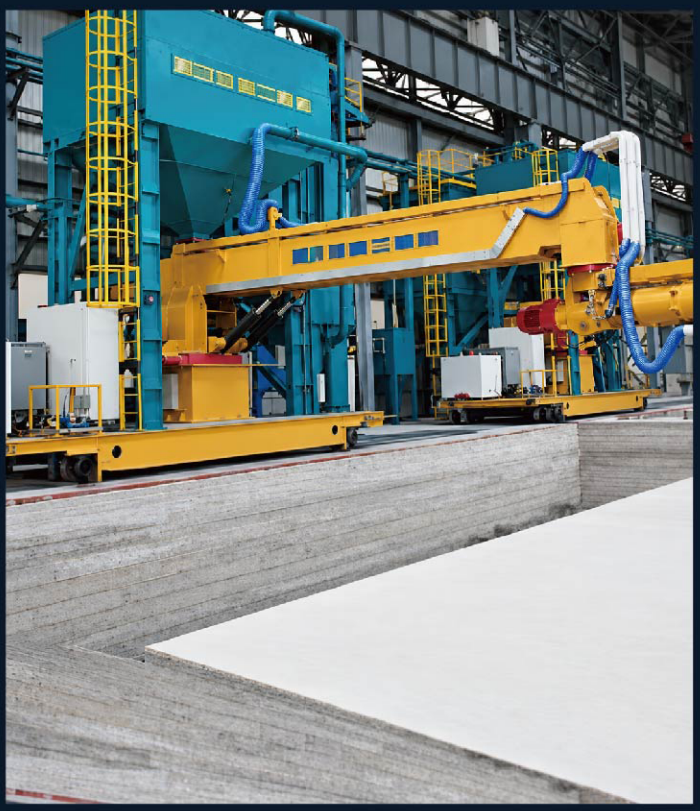

Surface treatment / Dimensional checks / Material verification

Drawing-based custom manufacturing for industrial OEM applications.

MANUFACTURING RESOURCES

SHAPED BY THE RIGHT PROCESS.

Process selection is reviewed against component geometry, material and project specifications.

PRECISION IN THE DETAILS

MACHINED TO YOUR DRAWINGS.

Turning, milling, drilling, tapping and grinding, according to project requirements.

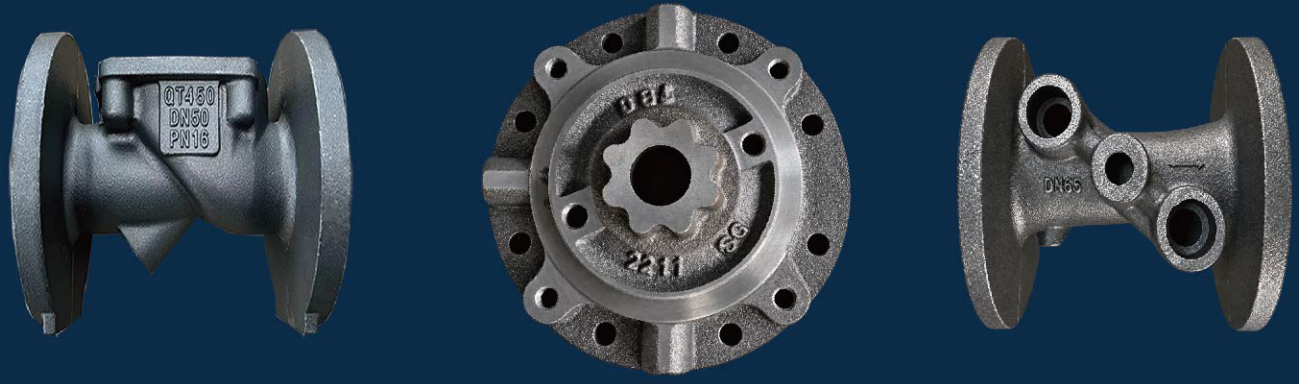

Focused on mating surfaces, mounting holes, tolerances and functional features specified in your drawings.

SELECTED MANUFACTURED COMPONENTS

CONTROL STARTS WITH THE COMPONENT.

Valve bodies, covers and OEM valve parts made to customer drawings or samples.

Examples shown. Markings are product-specific; exact material grades and properties require confirmation.

CUSTOM CASTINGS & MACHINED PARTS

ENGINEERED AROUND FLOW.

Pump housings, volute casings and impellers manufactured to your design.

INMORE

INDUSTRIAL MACHINERY

DRAWING-BASED METAL PARTS

FORM MEETS FUNCTION.

Custom brackets, structural castings, housings and precision machined industrial components.

QUALITY CONTROL

MEASURED AGAINST YOUR REQUIREMENTS.

COORDINATE MEASURING MACHINE (CMM)

HANDHLED-3D-SCANNER

Dimensional inspection and 3D scanning

Inspection scope, acceptance criteria and reporting requirements are reviewed for each project.

INSPECTION RESOURCES

VERIFY WHAT MATTERS.

Material analysis and selected non-destructive testing resources, matched to component and customer requirements.

01 / MATERIAL ANALYSIS

02 / MAGNETIC PARTICLE TESTING (MT)

03 / ULTRASONIC TESTING

04 / RADIOGRAPHIC INSPECTION

FROM DRAWINGS TO FINISHED PARTS

LET'S BUILD YOUR NEXT PART.

01

SHARE YOUR DESIGN

Drawings or samples, material and estimated volume.

02

DEFINE THE DETAILS

Machining, tolerances, surface treatment and inspection needs.

03

ALIGN THE PROJECT

Manufacturing scope, quality requirements and delivery expectations.

04

MAKE & INSPECT

Production and agreed inspections through our manufacturing resources.

Technical expertise / Consistent quality / Reliable delivery

YOUR RELIABLE OEM PARTNER

MADE TO YOUR DRAWING.

YOUR IDEA.
OUR EXPERTISE.
ONE PARTNER.

Custom Metal Castings & Precision Machined Components

Start a technical discussion with your drawings, material specifications and project requirements.
